

## Green Procurement

**1. How is your department planning to meet the objectives of the Policy on Green Procurement?**

For example, the NBC plans to proceed with initiatives already undertaken in order to reduce waste and promote waste recycling. The NBC also plans to conduct a study relating to the replacement of an oil-heating furnace in one of its buildings in order to be more efficient and environment friendly.

**2. Has your department established green procurement targets?**

Yes.

**3. Describe the green procurement targets that have been set by your department and indicate the associated benefits anticipated.**

- Use biodegradable products that are not environmentally harmful. The NBC is now testing the efficiency of these products.
- Steps are currently being undertaken. Reduce environmentally harmful waste.
